

AI Innovation Platform

Release Notes v1.4.0

June-30-2025 to **August-26-2025**

This document records new features and bug fixes implemented between June 30, 2025 to August 26, 2025.

Features & Improvements:

Enhanced User Experience & Interface

- The interface has been standardized with sentence casing and title casing conventions for improved readability.
- Added new banner notifications to indicate ongoing deployments with timeline information.
- Added comprehensive platform walkthroughs, both for the entire platform and individual modules via the "Start Intro" feature.
- Added "My Requests" section to profile options for all users to manage all pending user requests and their statuses.
- Introduced 2 Factor Authentication for all users during logging in.

My Tenant

- Redesigned the "My Tenant" sections with new pages for a more intuitive experience:
 - License & User management
 - Spend & Budgets
 - Transactions & invoices
- Users with multiple role assignments can now easily manage access across different tenants by switching their tenant from the tenant and role selector icon on the top right corner of the top bar navigator.
- A dedicated "Pending tasks" section has been added for tenant admins on the My Tenant dashboard to efficiently review and take action on various pending requests including project approvals, access permissions, and resource allocations, all at a centralized place.
- Added ability to edit Tenant name, description, and contact email for admins.
- Improved user additions by incorporating a feature to add users by clicking on Active Users under License & User Management section of the My Tenants module.

License Management

- Free sign-up experience introduced for users to register on the platform without incurring cost and without having to purchase a specific license.
- Streamlined how customers select, purchase, and manage subscription options across three tiers: Basic, Advanced and Enterprise with publisher as an add-on.
- Introduced a new transaction module for managing financial transactions within the My Tenant module.
- Added a new tab providing easy access to transaction history in the Transactions & Invoices section.
- Added functionality for reducing seats and removing users when modifying license seats via License & User Management.

User Management

- Enhanced user administration capabilities in the License & User Management tab, allowing for comprehensive viewing, adding, and removing of users within the tenant.

Project Management

- Project Services Enhancements:
 - Group and pin services for easier access.
 - Introduced a new user interface that provides the option to enable backup functionality for services at the project level, allowing for enhanced data protection and recovery capabilities.
 - Backup of services currently available only for Compute engine, Cloud composer and Artifact registry.
- Added folder name editing capabilities.
- Implemented soft budget settings at folder and project level to support budget setup.
- Security Features:
 - Enhanced service catalog with security improvements including HTTPS protection for Jupyterhub.
- Newly Added Services: Added support for HC API services, ML Flow, and MONAI-OHIF Framework.
- Implemented project bucket upload functionality for data upload.
- Implemented keyword-based search functionality for the projects page.

Marketplace Enhancements

- UI Improvements:
 - Updated layout by removing the carousel and redesigning "New Arrivals" section.
 - Limited search results to 4 items per line/carousel page for better visibility.
 - Fixed image stretching issues on item detail pages.
- Enhanced Functionality:
 - Implemented item deletion and editing capabilities.
 - Improved search functionality in cart module.
- Added filters on All Items and View All sections.
- Implemented advanced search across the entire marketplace with GenAI capabilities.
- Added filters and search for purchased items.
- Enhanced data access through publishing and consumption flows for diverse datasets including pricing negotiations and contacting the seller for data and consulting services.

Publishing Center

- Redesigned dashboard and created intuitive new pages for the "Publishing Center" sections.
- Publisher Features:
 - Added publisher profile management and artifact publishing capabilities.
 - Integrated comprehensive analytics for all published items via the Publishing Center's Dashboard page.
 - Enhanced filters and search on publisher profiles.

Digital Assistant

- Added the complete Digital Assistant feature, including advanced document creation capabilities.
 - Implemented library management for saving and organizing content.

- Added template gallery with custom template creation functionality.
- Enabled template categories and search capabilities.
- Now uses the newer 'text-embedding-005' version of the Gemini model.
- Ambient Assistant now available across all modules with static prompts including conversation, regeneration, and editing capabilities.
- Enhanced research assistant with Pubmed and clinical trials integration.
- Added template management for users to add their own templates for document creation.
- Added version history for tracking document changes.
- Integrated export options to various formats (PDF, DOCX, TXT).

Support & Ticketing

- Updated support portal with simplified user interface, clear ticket status tracking, and faster request submission.
- Added capability to view attachments within the support platform.

Admin Management and Controls

- Implemented new admin workflow for item approval from the requests tab in profile.
- Cost Management via My Tenant's Spend & Budgets section:
 - Added hierarchy and summary of cost reports.
 - Introduced cost reporting module and monitoring.
- Enhanced controls to remove users from projects and delete entire projects.

Documentation Changes

- Updated Content: Added documentation for August release features including publishing center, Tenant page, services backup, and cloud cost breakdown visibility.

Notes:

In the current implementation, only system admins are designated as "opt-in" users, granting them access to the full version of the digital assistant, while tenant admins and users are classified as "opt-out" users. Reach out to us in case you require "opt-in" access for your tenant.

• Features Coming for October Release:

- Marketplace Expansion: New cards for Consulting Services to help you find and purchase professional services via the initiate contact route and negotiating prices.
- Better Project Backups: Full project archival and backup options for all your services to protect your work.
