

# AI Innovation Platform

Release Notes v1.0.2

**November-04-2024** to **January-03-2024**

This document records information regarding enhancements made, features implemented, or any bug fixes done during November-04-2024 - January-03-2024.

## Features :

- Removal of the publisher's name from the tiles displayed in the related items section.
- Removal of the users section from the item detailed view page (except for publishers).
- Removal of the collaboration feature from the "Add Item" modal.
- Removal of the "Published By" option from filters.
- Changes on service creation modal - While creating a service, random integers are added to the service names to avoid confusion caused by duplicate names in the UI. Additionally, the project name is displayed along with the service name at the end.
- Cost reporting implementation along with IntroJS
- Landing page
- Caching across the entire UI app
- UUID changes
- Bug Fixes
- Hackathon Fixes
- Enhancements
- User Facing Documentation
  - Updated content and screenshots in alignment with the new bug fixes
  - Added Maintenance, Troubleshooting and Best Practices
  - Added Glossary and Abbreviations
  - Added Appendices and Supplemental Information
